## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11 and 19-27 are drawn to an apparatus and method for lossless compression.
- II. Claims 12-18 and 28-35 are drawn to an apparatus and method for lossless decompression.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as receiving a pattern identifier and pattern data for lossless decompression, the pattern identifier and pattern data not necessarily resulting from detecting a plurality of patterns in the raster data prior to compression, but rather patterns that may have otherwise been identified or designated. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and much of the search required for Group I is not necessarily required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).
